

# Seven Hills State School

## New multi-purpose hall

Seven Hills delivers an education program for students, from Prep through to Grade 6, that builds a foundation for future success as lifelong learners. The project is part of Queensland Department of Education's four-year investment program focussed on School Halls and Performing Arts Centres. The program enables various schools to deliver new facilities, infrastructure upgrades and refurbishments, focused on enhancing learning and creating opportunities for stronger engagement with communities.

-  Seven Hills, Queensland
-  \$11M
-  June 2023 – April 2024
-  Design and construction

### Project scope

This project underscores our commitment to modern, inclusive facilities designed to enrich both the learning environment and community experience.

The project includes:

- A new two-level multi-purpose hall, including staff office space, a multi-purpose room, single court, stage area, storerooms, kiosk and amenities
- 34 car spaces considering access for individuals with mobility challenges
- A new lift, stairs and interconnecting covered walkway, ramps, pedestrian footpaths and landscaping that integrate the new hall building with the surrounding buildings and spaces
- Upgrades to the existing external services to include fire and hydraulic scope, and electrical upgrade works
- Extension of existing services associated with, and required to service, the new building, such as security systems, communications, and ICT infrastructure

### Business value to client

The new multi-purpose hall will enable the school to meet the projected enrolment growth, while providing a welcoming space for the community to gather for special events and performances.

Seven Hills State School valued Wiley's highly collaborative approach, dedication to safety, and experience working in live educational environments, as the hall is in the centre of the school, between the oval and school buildings.

Wiley fast-tracked the project, commencing early site work whilst the contractor completed the design and building approvals. All upgrades to site services were delivered during the school holidays, ensuring the school's educational program was maintained.

### Partners and consultants

CPM Advisory and Project Management | Group GSA | Brandons Electrical | Allanna Plumbing | Bartley Burns | Watkins Steel | Leckton Linings | L and M Painting

*Wiley's professionalism, attention to detail, dedication to client satisfaction and considerate inclusive practices directed at our students with special needs, make them an ideal partner for construction endeavours of any scale.*
